
ytmusicapi

Release 0.5.0

Mar 23, 2020

Contents

1 Features	3
2 Usage Example	5
3 Contents	7
3.1 Setup	7
3.2 Usage	8
3.3 Reference	8
Index	13

The purpose of this library is to automate interactions with YouTube Music, such as retrieving your library content or creating large playlists.

This project is not supported nor endorsed by Google

CHAPTER 1

Features

- Library management: list, create, delete, and modify playlists and playlist items
- Search: Search for songs on YouTube Music
- Uploads: Upload songs, list uploaded songs and delete uploaded songs

CHAPTER 2

Usage Example

For a complete documentation of available functions, refer to the [Reference](#)

```
from ytmusicapi import YTMusic

ytmusic = YTMusic('headers_auth.json')
playlistId = ytmusic.create_playlist("test", "test description")
search_results = ytmusic.search("Oasis Wonderwall")
ytmusic.add_playlist_items(playlistId, [search_results[0]['videoId']])
```

CHAPTER 3

Contents

3.1 Setup

3.1.1 Installation

```
pip install ytmusicapi
```

3.1.2 Authenticated requests

To run authenticated requests you need to set up you need to copy your request headers from a POST request in your YTMusic Web Client. To do so, follow these steps:

- Open <https://music.youtube.com> in Firefox
- Go to the developer tools (Ctrl-Shift-I) and find an authenticated POST request. You can filter for /browse to easily find a suitable request.
- Copy the request headers (right click > copy > copy request headers)

Now call `YTMusic.setup()` and paste the request headers and it will create configuration file in the correct format in the current directory.

3.1.3 Manual file creation

Alternatively, you can paste the three missing items to `headers_auth.json` below and create your own file:

```
{  
    "User-Agent": "Mozilla/5.0 (Windows NT 10.0; Win64; x64; rv:72.0) Gecko/20100101 Firefox/72.0",  
    "Accept": "*/*",  
    "Accept-Language": "en-US,en;q=0.5",
```

(continues on next page)

(continued from previous page)

```
"Content-Type": "application/json",
"X-Goog-AuthUser": "0",
"x-origin": "https://music.youtube.com",
"Authorization": "PASTE_AUTHORIZATION",
"X-Youtube-Identity-Token": "PASTE_IDENTITY",
"Cookie" : "PASTE_COOKIE"
}
```

3.2 Usage

Unauthenticated requests for retrieving playlist content or searching:

```
from ytmusicapi import YTMusic

ytmusic = YTMusic()
```

If an endpoint requires authentication you will receive an error: Please provide authentication before using this function

For authenticated requests you need to set up your credentials first: *Setup*

Authenticated request to interact with your playlist:

```
from ytmusicapi import YTMusic

ytmusic = YTMusic('headers_auth.json')
```

Detailed example with authenticated requests:

```
from ytmusicapi import YTMusic

ytmusic = YTMusic('headers_auth.json')
playlistId = ytmusic.create_playlist("test", "test description")
search_results = ytmusic.search("Oasis Wonderwall")
ytmusic.add_playlist_items(playlistId, [search_results[0]['videoId']])
```

3.3 Reference

Reference for the YTMusic class.

class `ytmusicapi.YTMusic(auth=")`

Allows automated interactions with YouTube Music by emulating the YouTube web client's requests. Permits both authenticated and non-authenticated requests. Authentication header data must be provided on initialization.

`YTMusic.__init__(auth=")`

Create a new instance to interact with YouTube Music.

Parameters auth – Optional. Provide authentication credentials to manage your library. Should be an adjusted version of `headers_auth.json.example` in the project root. Default: A default header is used without authentication.

YTMusic.search(query, filter=None)

Search YouTube music Returns up to 20 results within the provided category. By default only songs (audio-only) are returned

Parameters

- **query** – Query string, i.e. ‘Oasis Wonderwall’
- **filter** – Filter for item types. Allowed values: ‘songs’, ‘videos’, ‘albums’, ‘artists’, ‘playlists’. Default: Default search, including all types of items.

Returns

List of results depending on filter. resultType specifies the type of item (important for default search). albums, artists and playlists additionally contain a browseId, corresponding to albumId, channelId and playlistId (browseId='VL'+playlistId)

Example list:

```
[  
  {  
    'videoId': 'ZrOKjDZotkA',  
    'artist': 'Oasis',  
    'title': 'Wonderwall (Remastered)',  
    'resultType': 'song'  
  },  
  {  
    'videoId': 'Gvfgut8nAgw',  
    'artist': 'Oasis',  
    'title': 'Wonderwall',  
    'resultType': 'song'  
  }  
]
```

YTMusic.get_playlists()

Retrieves the content of the ‘Library’ page

Returns List of owned playlists.

Each item is in the following format:

```
{  
  'playlistId': 'PLQwVIIKxHM6rz0fDJVv_0UlXGEWf-bFys',  
  'title': 'Playlist title'  
}
```

YTMusic.get_liked_songs(limit=1000)

Gets playlist items for the ‘Liked Songs’ playlist

Parameters **limit** – How many items to return. Default: 1000

Returns List of playlistItem dictionaries. See [get_playlist_items\(\)](#)

YTMusic.get_history()

Gets your play history in reverse chronological order

Returns List of playlistItems, see [get_playlist_items\(\)](#) The additional property ‘played’ indicates when the playlistItem was played

YTMusic.rate_song(videoId, rating='INDIFFERENT')

Rates a song (“thumbs up”/“thumbs down” interactions on YouTube Music)

Parameters

- **videoId** – Video id
- **rating** – One of ‘LIKE’, ‘DISLIKE’, ‘INDIFFERENT’

‘INDIFFERENT’ removes the previous rating and assigns no rating

YTMusic.**get_playlist_items** (*playlistId, limit=1000*)

Returns a list of playlist items

Parameters

- **playlistId** – Playlist id
- **limit** – How many songs to return. Default: 1000

Returns List of playlistItem dictionaries

Each item is in the following format:

```
{  
    'videoId': 'PLQwVIlKxHM6rz0fDJVv_0UlXGEWf-bFys',  
    'artist': 'Artist',  
    'title': 'Song Title',  
    'setVideoId': '56B44F6D10557CC6'  
}
```

The setVideoId is the unique id of this playlist item and needed for moving/removing playlist items

YTMusic.**create_playlist** (*title, description, privacy_status='PRIVATE'*)

Creates a new empty playlist and returns its id.

Parameters

- **title** – Playlist title
- **description** – Playlist description
- **privacy_status** – Playlists can be ‘PUBLIC’, ‘PRIVATE’, or ‘UNLISTED’. Default: ‘PRIVATE’

Returns ID of the YouTube playlist

YTMusic.**edit_playlist** (*playlistId, title=None, description=None, privacyStatus=None*)

Edit title, description or privacyStatus of a playlist.

Parameters

- **playlistId** – Playlist id
- **title** – Optional. New title for the playlist
- **description** – Optional. New description for the playlist
- **privacyStatus** – Optional. New privacy status for the playlist

Returns Status String or full response

YTMusic.**delete_playlist** (*playlistId*)

Delete a playlist.

Parameters **playlistId** – Playlist id

Returns Status String or full response

`YTMusic.add_playlist_items` (*playlistId, videoIds*)

Add songs to an existing playlist

Parameters

- **playlistId** – Playlist id
- **videoIds** – List of Video ids

Returns Status String or full response

`YTMusic.remove_playlist_items` (*playlistId, videos*)

Remove songs from an existing playlist

Parameters

- **playlistId** – Playlist id
- **videos** – List of PlaylistItems, see `get_playlist_items()`. Must contain videoId and setVideoId

Returns Status String or full response

Symbols
